TECHNICAL SKILLS

Web Development

HTML • CSS • JavaScript

UI/UX Design

Figma • Canva • UX Principles

Programming & Tools

Arduino IDE • ESP32 • Blender

Hardware & Embedded

IoT • Sensors • GSM/GPS • PDMS

LANGUAGES

- English *Fluent*
- Hindi *Native*

HACKATHONS

- **SIH 2025** — *College Runner-Up*
- **IIT-R Drone4s** — *9th / 60 Teams*
- **IIT-B ANIMATE 2025** — *Top 3, Consolation*
- **Hack Arya Verse 2.0** — *18th / 140 Teams*

ACHIEVEMENTS

- TPO 2025 — Student Coordinator
- Agresar Club — Head Designer
- IIT-B Hackathon — All India Rank 9
- TPO 2026 — Designer Team

INTERESTS

- 3D Modelling & Animation
- Embedded Systems Tinkering
- UI/UX Prototyping

PROFESSIONAL SUMMARY

Electronics Instrumentation & Control student with a strong foundation in embedded systems, IoT, and sensors, combined with hands-on web development (HTML/CSS/JS) and UI/UX design (Figma, Canva). Builds real-world hardware-software integration projects for smart automation. Recognised in national hackathons at IIT-Bombay and IIT-Roorkee. *Seeking an internship in electronics/automation to contribute to reliable instrumentation and embedded system development.*

EDUCATION

B.Tech — Electronics Instrumentation & Control Engg.

2023 — 2027

CGPA: 7.1

[Government Engineering College, Ajmer](#)

PROJECTS

CivicWatch

Web Application

A full-stack web platform designed for real-time civic issue reporting and monitoring across Jodhpur. Citizens can submit geo-tagged complaints with photos, track resolution status through a live dashboard, and visualise problem hotspots on an interactive heatmap — effectively bridging the communication gap between residents and municipal authorities.

HTML CSS JavaScript Node.js MongoDB

AirPulse — AQI Monitor

IoT / Embedded

An IoT-based air quality monitoring system employing the Sharp GP2Y1010AU0F optical dust/particulate sensor interfaced with an ESP32 microcontroller. Sensor readings are processed and transmitted in real-time to a Google Sheets dashboard via Wi-Fi, enabling remote access to continuous AQI data logs for environmental analysis.

Arduino IDE ESP32 GP2Y1010AU0F Google Sheets API

Arogyam — Health Monitor

IoT / Embedded

A non-invasive wearable health monitoring system that utilises a PDMS (Polydimethylsiloxane) flexible pressure sensor to detect pulse waveforms and measure physiological parameters. Data is acquired and processed by an ESP32, enabling portable, real-time health tracking without the need for conventional rigid medical sensors.

PDMS Sensor ESP32 Signal Processing

AirSential — Air Quality Tracker

IoT / Embedded

A portable, field-deployable air quality and location tracking device that combines multiple gas sensors with GPS and GSM modules for geo-tagged environmental data collection. Sensor readings are timestamped with GPS coordinates and transmitted via GSM, enabling remote mapping of pollution levels across different geographic zones.

GSM GPS Arduino IDE Air Quality Sensors

INTERNSHIP & EXPERIENCE

Jodhpur — North Western Railway

3 Weeks

Hands-on exposure to signal & instrumentation systems, relay logic panels, railway control infrastructure, and scheduled maintenance protocols within a live operational environment.

Public Works Department, Jodhpur

7 Weeks

Assisted in infrastructure monitoring, site documentation, and technical reporting. Developed practical understanding of civil-electronics interface applications and instrumentation standards used in state government infrastructure projects.

DECLARATION

I hereby declare that all information furnished above is accurate and true to the best of my knowledge and belief.
